Response to Office Action and Amendment

The Honorable Assistant Commissioner  
For Patents  
Washington, D.C. 20231

Dear Examiner:

This paper is included because the Notice to File Missing Parts of February 19, 2001 required a Sequence Listing. This paper provides for the additional changes in the specification, noting where the sequence listing references are to be inserted. Moreover, obvious typos also are being corrected.

AMENDMENT

In the Specification:

On page 5, line 28, after "GCG (T)<sub>15</sub> 3')", please insert SEQ ID NO:1.

On page 7, line 24, before the period, please insert SEQ ID NO:2.

On page 19, line 6, please change "Reactions" to Reaction. On line 25, please change "ration" to ratio.

On page 19, line 28, after "GCG (T)<sub>15</sub> 3')", please insert SEQ ID NO:1.

On page 22, line 15, after please change "Cronex" to CRONEX® and insert x-ray before "intensifying" on line 16.

On page 23, line 6, after "T7<sub>57</sub>)", please insert SEQ ID NO:1.

RESPONSE

Because this application contains nucleotide sequences, Applicants were requested to provide a sequence listing and to insert appropriate sequence identifiers into the specification at pages 5, 7, and 8, which was done in the above amendments. In addition, the undersigned noticed that the application also uses an abbreviation (T57) for

SEQ ID NO:1, which includes 57 nucleotides. The undersigned also inserted SEQ ID NO:1 after the first occurrence of T57. A Response to Notice to Comply with Requirements with substitute pages, including a Sequence Listing in paper form, a computer-readable sequence listing and a copy of the Notice to Comply also is enclosed.

CONCLUSION

The undersigned avers that the enclosures are sufficient to pass the application to the Group for processing and would appreciate a telephone call if that is not so.

Respectfully submitted,

Date: 5/24/2001
